(CLASSIFICATION)

FORUM PANEL RECOMMENDATION	DATE 23 October 1968

RECOMMENDATION DDP/RID will maintain complete cable & dispatch chronos on microimage. Documents will be classified & x-refed by automation. Files will not be kept as we know them but will be reconstituted as needed by obtaining a run-out of contents & then going to the chronos. Or, specific documents can be requested. This applies to the Field & to Hqs.

EXPLAIN RELATED REASONS OR PROCEDURES

The Field as a whole has a need for ready access to past documents while keeping holdings down to a minimum for security reasons. This system will give them cabled access to past traffic.

Headquarters can cut very drastically its inactive records and reduce its active holdings considerably.
